

In the Specification:

Please replace the paragraph beginning on page 7, line 14 with the following rewritten paragraph:

According to the present invention, when a plurality of pixels ~~is~~are connected, electrical disconnection is made between other pixels excluding a predetermined one among the connected pixels and a signal supply line (data bus line or gate bus line). Accordingly, the plurality of connected pixels ~~is~~are driven by a signal supplied to one pixel. As a result, the number of apparent connections can be reduced by one and, when the number of connections is small, it is not necessary to put aside the panel as a defective product.
